

Study Storm Lesson Plan

Teacher: Chisha Chisha
Date: 2023-04-05
Class: Grade 1
Duration: 80mins
Subject: Chemistry
Topic: Non-Metals
Sub-Topic: General properties of non-metals.-Air Composition

Rationale: This is the 1st lesson in the series of 6 lessons to cover this topic. The learner will learn about uses of the gases collected after fractional distillation of liquid air. This will grow their appreciation and awareness for the use of the gases in everyday lives and the importance of avoiding polluting air. The method used are demonstration, discussion, video demonstration, answer and question.

Lesson-outcomes: Describe the uses of gases that are part of air composition.

1.Identify common air pollutants, their sources and explain their effects.

2.Describe some methods of reducing air pollution
